# JONATHAN RUIZ

FRONTEND DEVELOPER

Experience

Front-end Developer - [02/2022 - Present]
I currently work with a group of friends doing Front End development and I have access to their Jira to see and carry out the tasks assigned to them, Figma to see the design and adapt it and Gitlab to make the pull requests.

Tasks in which he contributed:

- Responsive design with Tailwind and Bootstrap.
- Bug fixes of application.
- Repeated code fix, to obtain a more scalable application in the future.
- Build a more confident test suite with CypressJS, React Testing Library, Jest and MSW.
- Creation and correction of components in React.
